Summary

Final semester Computer Science student with practical experience in SQL (MySQL), Excel dashboards, and Power BI. Skilled in cleaning data, tracking KPIs, and turning data into clear business insights for product and customer analytics. Detail oriented and focused on actionable recommendations. Completed the Deloitte Data Analytics Job Simulation and holds the IBM Data Analyst Professional Certificate.

Education

BSc in Computer Science, *BRAC University* 2023(January) – 2027(January)
CGPA 3.51

Higher Secondary Certificate, *Adamjee Cantonment College* 2021
GPA 5.00

Secondary School Certificate, *Adamjee Cantonment Public School* 2019
GPA 5.00, Scholarship

Work Experience

Teacher Assistant, *Charulata Pre-School* 2023 – 2024
- Assisted teachers in lesson delivery and classroom management.
- Provided academic support to students in individual and small group settings.

Skills

Analytical
Data cleaning, EDA, KPI reporting, churn and customer analysis, business insights

Business Intelligence
Power BI, DAX, Excel dashboards, data visualization

Database
SQL, MySQL, relational database design, window functions, stored procedures

Microsoft Excel
COUNTIFS, SUMIFS, AVERAGEIFS, INDEX/MATCH, LOOKUP, data validation, conditional formatting

Programming
Python (Pandas, NumPy), XGBoost, SHAP, SMOTE

Tools
Git, GitHub, Jupyter Notebook, Google Colab, LaTeX

Projects

iOS App Store Product Analytics (SQL / MySQL) GitHub
- Built a MySQL database from 7,197 App Store apps and 5,000 simulated subscription events, with SQL cleaning, views and a stored procedure.
- Found multilingual apps rate higher (3.71 vs 3.38); the biggest funnel drop off (67.4%) is paywall view to trial start.

Mobile App Market Analysis: Google Play vs App Store (Excel) GitHub
- Cleaned and compared 9,659 Google Play and 7,197 App Store apps; built a 12 card Excel dashboard.
- Found 43.6% of iOS apps are paid vs 7.8% on Android; wrote recommendations for a product team.

Telco Customer Churn Dashboard (Excel) GitHub
- Cleaned 7,043 records and built a dashboard (6 KPI cards, 6 charts, filters) on 15 formula driven tables.
- Found 26.5% churn (42.7% month to month vs 2.8% two year); built a risk score and retention simulator.

Telecom Customer Churn Analytics Dashboard (Power BI) GitHub
- Built a Power BI dashboard on a synthetic 5,000 customer dataset with DAX KPIs (churn rate, ARPU, revenue loss).
- Segmented customers by churn risk, surfacing 168 high risk customers and BDT 77,750 monthly recharge at risk.

Telecom Churn Prediction on Cell2Cell Dataset (Python) GitHub
- Built a leakage controlled pipeline on 51,047 records; compared 7 models with 5 fold CV, SMOTE and SHAP.
- Reported realistic F1 of 0.36 to 0.41; equipment and usage features mattered most.

Certification

Data Analytics Job Simulation
Deloitte (via Forage), June 2026 | Credential

IBM Data Analyst Professional Certificate
IBM (via Coursera) | Credential

CS50P: Introduction to Programming with Python
Harvard University | Credential

IBM Generative AI Engineering Professional Certificate
IBM (via Coursera) | Credential
